Automatic voltage regulator with surge protection

DELAY START SYSTEM

(30s. 1m. 3m.)

It has a high performance voltage suppressor that absorbs peaks and corrects high and low voltages of electric fluid, the equipment has a delay device of On to protect your appliances (microwaves, refrigerators, and other electronics) as the power supply stabilizes.

Its built-in components filter out harmonic noise that damages electronic logic circuits and protects from spikes and high voltages on telephone and DSL lines.
